

XAVIER-BONHEUR TOKO-PROUST

COMPUTER SCIENCE STUDENT — CYBERSECURITY ENTHUSIAST

📍 Paris, France | ✉ xaviertoko.pro@gmail.com | 🌐 azar-security.site
🔗 [Azarkovich](#) | [in](#) Xavier TOKO-PROUST

PROFILE

Final-year Computer Science student passionate about both offensive and defensive cybersecurity. I have built a strong technical foundation through academic projects and self-directed learning on TryHackMe. I am seeking a challenging entry-level opportunity to apply my skills in Security Operations, vulnerability assessment, and secure development.

TECHNICAL SKILLS

Offensive (Red Team): Burp Suite, OWASP, Nmap, Metasploit

Defensive (Blue Team): Splunk (SPL), Sigma, Wireshark, MITRE ATT&CK

Programming: Python, Bash (Automation), C/C++, JavaScript, SQL

Systems & Tools: Linux (Ubuntu/Kali), Windows, MacOS, Git, Docker, SQLite

PROJECTS & SECURITY RESEARCH

Password Manager v3

Python, Cryptography

[Blue Team] Secure vault using AES-GCM encryption

2022 – Present

- Developed a secure manager implementing zero-knowledge architecture.
- Focused on attack surface reduction and secure key derivation/handling.

Alert Triage - Nmap Detection

SOC, Network Analysis, Wireshark

[Blue Team] Defensive analysis & Threat hunting

2026

- Investigated suspicious network traffic to detect and triage unauthorized Nmap scanning activity.
- Analyzed raw PCAP data to identify stealth scan signatures (SYN, UDP) and documented IOCs.

Web Vulnerability Analysis (XSS & SQLi)

DVWA, Web Security

[Red Team] Vulnerability exploitation & mitigation

2026

- Deep dive into XSS and SQL Injection mechanics, moving from error-based to blind exploitation.
- Analyzed injection vectors, DOM manipulation, and implemented mitigations (CSP, Prepared Statements).

CyberSecurity Home Lab

Bash, Linux, VirtualBox

[Red Team] Vulnerability assessment environment

2025

- Built a testing environment to analyze vulnerabilities: XSS, SQLi, LFI/RFI, Bruteforce.
- Performed reconnaissance and automated scanning scripts using Bash.

Network & System Development

Python, C++

Academic & Personal Projects

2023 – 2025

- **Chat Server:** Built a client-server app with TCP sockets and thread management in Python.
- **Ecosystem Sim:** Developed a C++ simulation engine with complex entity interaction rules.

EDUCATION

University Paris 8 - Saint Denis

Paris, France

B.Sc. in Computer Science (Licence 3)

2022 – Present

- Focus: Algorithms, Programming, System Administration, Web Development.

Lycée Gustave Eiffel

Paris, France

Baccalauréat in Science (A-Level Equivalent)

2018 – 2021

CERTIFICATIONS & TRAINING

TryHackMe: Penetration Tester Level 1 (In Progress), SOC Level 1 (In Progress), Pre-Security (Completed), CyberSecurity 101 (Completed).

CTF & Events: Advent of Cyber 2025 (Completed), Love at First Breach 2026 (Completed), THM-Room: Biblioteca (Completed)
