PROFILE

Final-year Computer Science student with hands-on experience in both offensive and defensive cybersecurity. I have built a strong technical foundation through academic projects, personal virtual labs, and self-directed learning on TryHackMe. I am seeking an entry-level position as a SOC Analyst, Junior Penetration Tester, or Cybersecurity Engineer where I can apply my skills in threat detection, vulnerability assessment, and secure development.

TECHNICAL SKILLS

Offensive (Red Team): Burp Suite, OWASP, Nmap, Metasploit

Defensive (Blue Team): Splunk (SPL), Sigma, Wireshark, MITRE ATT&CK

Programming: Python, Bash (Automation), C/C++, JavaScript, SQL

Systems & Tools: Linux (Ubuntu/Kali), Windows, MacOS, Git, Docker, SQLite

PROJECTS & SECURITY RESEARCH

PurpleKEY (formerly *Password Manager v1 - v3*)

Python, Argon2id, AES-GCM, PySide6

[Blue Team] Multi-year project — local vault with zero-knowledge architecture

2022 – Present

- Iterated over 3 versions (CLI → modular → full GUI) before rebranding as PurpleKEY.
- Final version uses AES-256-GCM encryption, Argon2id key derivation, and a custom PySide6 interface.

Alert Triage — Nmap Scan Detection

SOC, Network Analysis, Wireshark

[Blue Team] Defensive analysis & Threat Hunting

2026

- Investigated suspicious network traffic to detect and triage unauthorised Nmap scanning.
- Analysed raw PCAP data to identify stealth scan signatures (SYN, UDP) and documented IOCs.

Web Vulnerability Analysis — XSS & SQL Injection

DVWA, Web Security

[Red Team] Exploitation & mitigation

2026

- XSS: analysed Reflected, Stored and DOM vectors; session hijacking scenarios; mitigations (CSP, HttpOnly).
- SQLi: from Error-Based to Blind exploitation (Boolean, UNION, Time-Based); implemented prepared statements.

Personal Cybersecurity Home Lab

Bash, Python, Linux, VirtualBox

[Red Team / Blue Team] Multi-VM attack & defence environment

2025

- Isolated multi-VM setup (Kali attacker, Windows 10 target, Purple Kali SOC analyst, Metasploitable 2).
- Developed a custom Python port scanner with service fingerprinting and structured report output.

System & Network Development

Python, C++

Academic & Personal Projects

2023 – 2025

- Chat Server:** Client-server app with TCP sockets and multi-thread management in Python.
- Ecosystem Simulator:** C++ simulation engine with complex entity interaction rules.

EDUCATION & CERTIFICATIONS

University Paris 8 – Saint-Denis

Paris, France

B.Sc. in Computer Science (Licence 3)

2022 – Present

- Focus: Algorithms, Programming, System Administration, Web Development.

Lycée Gustave Eiffel

Paris, France

Baccalauréat Scientifique (A-Level equivalent)

2018 – 2021

TryHackMe: Penetration Tester L1 (*in progress*), SOC Level 1 (*in progress*), Pre-Security (*completed*), CyberSecurity 101 (*completed*).

CTF & Events: Advent of Cyber 2025 (*completed*), Love at First Breach 2026 (*completed*), THM: Biblioteca (*completed*), THM: Valenfind (*completed*).

LANGUAGES

- French** — Native
- English** — Fluent
- German** — Basic

SOFT SKILLS

- Analytical thinking
- Autonomy & initiative
- Rigour & attention to detail
- Red / Blue / Purple adaptability

INTERESTS

- Piano — Conservatoire, 2nd cycle
- Basketball, Running
- CTF (TryHackMe, root-me)
